

FLANDERS

EZ Flow II disposable filters are designed for protection of furnace and central air units in residential and light commercial applications. Construction of both models is identical except for the media retainer. The EZ Flow features a metal media retainer on the downstream side while the EZ Flow II has no media retainer. Instead, the media itself is adhered directly to the frame for non-metallic applications.

Construction: The frame is made from heavy chipboard in a one-piece design that eliminates corner separation. The filtering media is continuous filament spun glass. A resinous bonding agent provides rigidity and resistance to media compression.

The EZ Flow II is made to function without a retainer, by adhering the frame directly to the media which has a light skin to make it self-retaining.

SEALING is accomplished with a resilient hotmelt adhesive running the full perimeter of the frame on both upstream and downstream sides. UL MARKING appears on the filter frame.

These filters have been tested by Underwriters Laboratories Inc. and are classified as UL 900 Class 2 for flammability.

CLARCOR

CLARCOR Air Filtration Products, a CLARCOR Company, is one of the world's foremost manufacturers of air filtration products for the commercial, industrial and institutional markets. Our products can be found improving the quality of air around the world in hospitals, office buildings, industrial plants, laboratories, pharmaceutical facilities, schools, museums, sports arenas and many more facilities where clean air is critical.

The Key Pleat™ self supported pleated filter has a MERV 8 rating. The filter is made of 100% synthetic media. The media pack is contained in a single piece beverage board. Self-supported Key Pleat filters eliminate the need for a metal backing to shape the pleats. They are fully incinerable, simplifying disposal. Key Pleat is available in 1" and 2" Standard Capacity and 1", 2" and 4" High Capacity.

CLARCOR

PROCESS INNOVATION, DESIGN EXCELLENCE AND IMPROVED MEDIA

Purolator's self-supporting media and innovative automated manufacturing process produces consistent pleat shape and spacing in each Key Pleat. This state-of-the-art media pack is surrounded by a single-piece, beverage board die cut frame, with structural integrity unlike any self-supported filter available today. The Key Pleat MERV 8 can endure impact and deformation and return to its original shape, ready for installation. That means you avoid the time and cost that are often wasted replacing damaged wire-backed filters.

DUST FREE

Breathing airborne pollutants often triggers allergy, asthma, and hayfever symptoms. As house dust, mold, and pollen are captured by the Allergy Gold, patients generally breathe easier and have fewer symptoms. Improved sleep patterns and a sense of well being are additional benefits. Having an Allergy Gold installed in a well maintained central air system can result in a cleaner, healthier indoor environment.

Features

- Lifetime Warranty
- 90 Day Money Back Guarantee.
- Anti-Microbial Media Core
- Three Layers of Filtration Media
- Gold-anodized Aluminum Frame
- Pull Tabs
- Drain Holes
- 40 Standard Sizes (1" frames)
- Custom Sizes Available

Specifications

- 90% Peak Arrestance
- 89% Average Arrestance
- .12" Initial Resistance at 1200 CFM
- 85 grams Dust Holding Capacity at .5" w.g.
- 125 grams Dust Holding Capacity at 1" w.g.
